Indexes to *Nuclear Safety*, Volume 26

Cumulative indexes of issues of *Nuclear Safety* through Volume 22 were published as separate documents and are available from the National Technical Information Service. Starting with Volume 23, author and KWIC indexes are published in the first issue of the following volume. Thus this issue contains these indexes for *Nuclear Safety*, Vol. 26. Both indexes use a seven-digit number to indicate the location of the indexed material. The seven-digit number is divided into four parts (00-0-0-000), which stand, respectively, for volume–number–section–page. The authors are indexed alphabetically. In the KWIC (Key Word in Context) index, the article titles are permuted around the various significant words contained therein. For example, the title "Design Basis for Nuclear Power Plant Protection Systems" is indexed under the words Design, Nuclear, Power, Plant, and Protection. The index words are arranged alphabetically in a column in the center of the page, with the titles permuted around them. A slash (/) indicates the end of a title. The two indexes follow.
